Vyo.

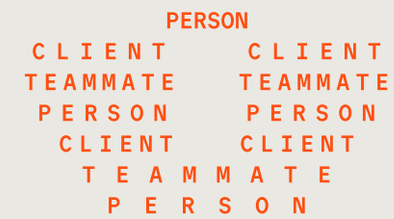

WHERE THE CODE LIVES

Your app on one page, for a person who has never seen its code.

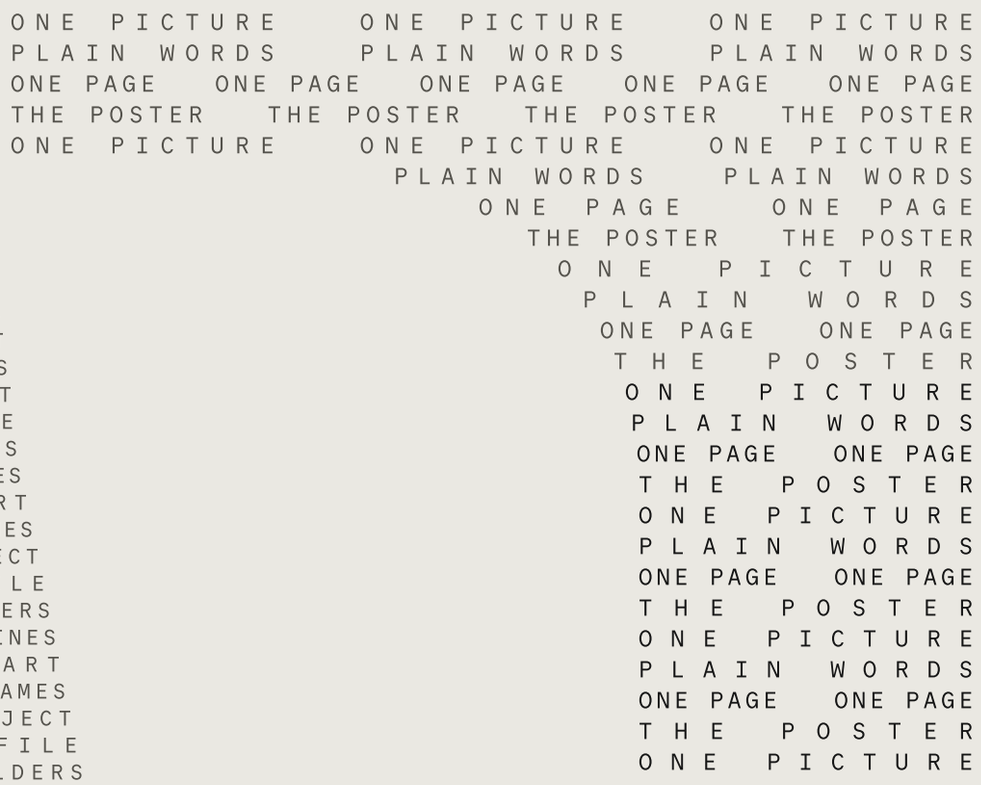

What crosses. A picture of the project's parts and a few plain words around it, checked for jargon first.

SOMEONE WHO DOES NOT CODE

How it works
Ask your coding agent to explain the app. Vyo reads the project, draws its parts as one picture and writes a few plain words around it.

Checked first
Every word is checked for jargon, file paths and text that runs into the picture. Each problem is named, so it can be fixed.

What you get
One PNG and one PDF, sized like a poster. Send it to a client, a manager or a friend who does not code.

Not built yet: drawn shapes on the 4:5 sheet, files other than PNG and PDF
